URETEK ICR
Customer References for Infrastructure Repair

Dear Valued Customer:

URETEK ICR puts cities and municipalities in control to deliver Infiltration and Inflow repair using patented **URETEK** material. The confidence level we have created with our customers has allowed us to actively pursue new customers and offer our proven technique and process as a viable repair process to address infiltration and inflow problems.

URETEK has developed the ability to repair and rehabilitate infiltration and inflow problems in manholes, sewer lines, storm drains, levees, dams, tunnels and also address soil stabilization and voids. Our process is proven to help end users address costly repairs and replacement and save thousands of dollars against traditional repair cost.

Listed below are but a few of our valued customers:
